DOA SAFAR (TRAVEL PRAYER)

In the name of Allah, Most Gracious, Most Merciful
Praise be to Allah, the Cherisher and Sustainer of the Worlds, and may peace be upon our Honourable Prophet and Messenger (Muhammad Sallallahu 'alaihi wasallam), his family and companions.
May peace be upon all of them.
In the name of Allah, we invoke His name as we embark on this journey and even when we are at rest. For my Lord is Ever Forgiving, Most Merciful, and no just estimate have they made of Allah, such as is due to Him.
Glory be to Him who has brought this under our control, for we could never have accomplished this by ourselves. And to our Lord, surely must we return.
O Allah, we ask of You for goodness and piety on this journey, and from our deeds that meet Your pleasure.
O Allah, lighten our burden on this journey and bridge the distances between us.
O Allah, You are our companion on this journey and the Protector for the family we leave behind.
O Allah, verily we seek refuge in You from this journey's hardship, from evil eyes and misfortune to befall our household.
And may the Grace of Allah be bestowed upon our leader, Prophet Muhammad sallallahu 'alaihi wasallam and his family and companions.
And Praise be to Allah, the Cherisher and Sustainer of the Worlds.

This CGI-heavy creation is full of pop culture nods to the likes of *Back to the Future*, *Willy Wonka, Mad Max* and *Lord of the Rings*, to name just a few. It also employs an awareness of a legion of video games, as well as Ernest Cline's science fiction novel of the same name. The result is as overwhelming and impressive as it is entertaining.

Wade Watts played by Tye Sheridan dives into the virtual reality world as the avatar, Parzival.

© Warner Bros.

Set in 2045, *Ready Player One* depicts a gloomy dystopian future.

This movie represents Spielberg's wizardry at its best; the now 71-year-old director is a genius in this genre.

This virtual reality fantasy adventure is one of director Steven Spielberg's most imaginative as he takes viewers on an immersive and experiential experience. Set in Columbus, Ohio, in 2045, it's a dystopian future in the 'fastest-growing city in the world.' People live in dirty, gloomy and unsteady trailer homes, piled on top of each other to form makeshift high rises, filled with poor inhabitants.

This depressing, meaningless reality is how most people live. So, to alleviate the emptiness, they've resorted to wearing 3D headsets and bodysuits to plunge into the imagined universe of The Oasis. Here, no-one uses their real names and to feed the fantasy, a teenage girl could be an old man, and a little boy could be an 8-foot monster.

The soundtrack is a perfect fit, with pop tunes cleverly worked in to reflect the narrative. Lending a layered effect, 1980s favourites like Tears for Fears 'Everybody Wants to Rule the World,' give another dimension to the feel of the film.

Wade Watts (Tye Sheridan), is a switched-on nerd with an Avatar, Parzival, that resembles Ryan Gosling. Inventor of The Oasis, the dry-humoured, socially awkward, James Halliday (Mark Rylance), is dead. Now, immortalised as a wizard in the virtual-world, he put a three-bit riddle into The Oasis. Whoever solves it, stands to inherit Halliday's hundreds of billions, as well as gaining authority over The Oasis.

Teaming up with his besties, Art3mis (Olivia Cooke) and Aech (Lena Waithe), Parzival goes in search of the three keys, known as 'Gunters.' To solve the riddles and evade the hazards, these underdogs have to get to the bottom of the riddles and work against the Innovative Online Industries, lead up by Nolan Sorrento (Ben Mendelsohn).

This movie represents Spielberg's wizardry at its best; the now 71-year-old director is a genius in this genre. Continuing his legacy of sensationally scary movies, this is another triumph in a long line of blockbusters over the decades. From *Jaws* to *E.T.*, *Jurassic Park* to *Minority Report*, nobody does it better.

BLACK LIGHTNING

Yes – this is a superhero show, but it's much more than just an origin tale detailing how the hero got their power. Beyond just action, this film fills out with some substance; it's all about the characters before anything else, with the powers coming in second.

Gifted with the ability to utilise and sway electricity, ex-vigilante, Jefferson Pierce (Cress Williams), protects the streets of his hometown as the masked rebel, Black Lightning. It does have its fair share of violence, but the difference is, it's not without resonance, it's not for violence sake.

Struggling to balance superhero and family life, Pierce constantly comes home injured and worse for wear, relentlessly putting his life on the line. Overwhelmed by his lifestyle, his wife, Lynn (Christine Adams), leaves him. Stung by the breakup, Jefferson walks away from hero life to become a high school principal where he seeks to make a difference like he did as Black Lightning.

Dealing with intricate themes, it's a multi-layered show which highlights race. Developed by Mara Brock Akil and Salim Akil, this show has an intelligent agenda, expertly crafted by everything from the sharp writing, to the watertight production, music and direction. The real skill is that the show manages to explore politics while still showcasing super-heroics and family dynamics, all with integrity and some hilarity.

Having seen his daughters, Jennifer (China Anne McClain) and Anissa (Nafessa Williams), grow up over the past ten years, Pierce is finally called back to his alter ego. When dangerous gang, The One Hundred, gets mixed up with his loved ones, Black Lightning must return to rescue both his nearest and dearest, as well as his community at large.

While *Black Lightning* is the first black character to headline a DC story, it's the portrayal of Jefferson's daughters as anti damsels-in-distress that stands out. In the fully-realised world of Freeland, *Black Lightning* is ultimately as hopeful as it is complicated.

VOICENOTES

From YouTube sensation to self-produced pop prince, Charlie Puth finds his groove on his second studio album, *Voicenotes*.

R&B inspired pop artist Charlie Puth, is back with a second album full of memorable tunes.

Charlie Puth's second studio album - *Voicenotes*

Rising to fame with his channel, Puth soon shot to stardom with his pop-rap debut track 'See You Again,' which featured on the 'Furious 7' soundtrack. Outclassing his first album, Nine Track Mind, here, Puth's sound is smooth, breezy and rich with intent, showcasing a skilfully layered sound with unfiltered lyrics. Sitting comfortably and confidently within the realm of R&B-inspired pop, this young singer frankly explores his shortcomings and the unworldliness of youth.

On the opening and closing tracks, 'The Way I Am,' and 'Through It All,' he confronts the harmful effect of his 'fast celebrity.' Building a brash groove, the next track 'Attention,' packs a punch and continues to elevate the charisma of his songwriting talent. All through the album, Puth masters the execution of the crafted chorus to create memorable and listenable tunes.

He also adds another dimension of talent with a dynamic collaboration with Kehlani on his bust-up ode, 'Done for Me.' When Puth gets quiet, there's a certain rawness to his voice quality, using ballads, 'Patient,' 'If You Leave Me Now,' and 'Change' to offer up some subtle vulnerability.

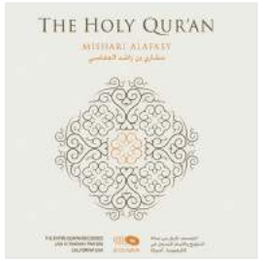

Puth puts his lyrics in the spotlight with his piano-inspired track, 'Through It All,' stripping back heavier production to expose a bold sensibility.

As a whole, this 13-song album demonstrates great evolution, versatility and skill across both his vocals and production. It's a testament to Puth pulling through his sudden success with his creative gusto still intact. The catchy and sincere nature of Puth's craft shows that this artist is here to stay.

All through the album, Puth masters the execution of the crafted chorus to create memorable and listenable tunes.
